

# HD Jems

European HD-SDI to and from DVI, HDMI, and analogue converters.

Now with Multichannel embedded audio options and low profile cases.

- **Convert HDV cameras and Set Top Boxes via full bandwidth analogue components to HD-SDI**
- **Use HDMI or DVI consumer Displays and recorders on HD-SDI systems**
- The same focused simplicity, functionality and value as our SCART to SD-SDI “JEM” Range.
- HD MEJ. = Analogue components in and 2 x HD SDI out. Optional 8 channels of analogue or digital audio embedding.
- HD JEM. = HD SDI in, DVI-I /HDMI digital and analogue components out, with 2 x HD SDI reclocked out and optional 8 channels of analogue or digital audio de-embedding. Drives headphones directly from the outputs.
- No Scaling, low latency conversion.
- Fast boot up in milliseconds.
- Wide range of power options, including signal cable feed.
- Slim mounting profile (120 x 88 x 22mm), mounting up to 20 in a 2U Rack space.

**Price Guide from GBP 650\* according to facilities**
